

County College of Morris

A Message From Our President

As a community college with an outstanding faculty and staff who are committed to providing the best learning opportunities, County College of Morris (CCM) truly does offer something for everyone. For children, it's learning about the universe in the Longo Planetarium, to taking swimming lessons in our pool, to getting a head start on college through our Challenger Program for high school students. For adults – both young and older – we provide an affordable pathway for obtaining a high-quality college education. With more than 200 transfer agreements, CCM also makes it easy for students to earn their associate degrees and then enroll in a four-year college or university to earn a bachelor's degree or higher. For those looking to transition to a new career or enhance an existing one, we offer a wide-range of certificate and professional development programs through our Center for Workforce Development. Thousands of people each year take advantage of those programs to get a job, get a better job or be more effective in the job their in. In addition, we offer numerous activities and events to enrich people's lives. That's the essence of community colleges – providing people with pathways to experience an extraordinary life. At CCM, we have been fulfilling that mission for more than 50 years.

We welcome your interest in your community college and invite you to take full advantage of all we have to offer. We look forward to having you join the CCM community.

Dr. Anthony J. Iacono
President, County College of Morris

Something for Everyone
